Hazardous substance assessment reference

Date	**Time** start and finish	**Where** location on site	**Situation** for example, hard surface or verge	**Area treated** m^2 or ha	**Target** weed, pest or disease	**Product name**	**Authorisation number**	**Dose** per ha, as on label	**Water volume** litres per ha	**Total product used** litres or kg	**Weather** wind speed and direction, temperature	**Buffer zone** buffer zone assessment or label, if any	**Signs** put up and taken down

What the law asks for. Professional users must keep a record of every application, showing the product, the time and dose, and the area and crop or situation treated, for at least three years (Regulation (EC) 1107/2009 Article 67, as it applies in Great Britain). The other columns are good practice under the Code of Practice for using plant protection products. Always read the label: the label takes precedence.
